

# Report of the evaluation for the 20<sup>th</sup> Annual Meeting of I:S:D:S/ Austrian Chapter

There have been 62 participants, to all of them we sent an evaluation form.  
We got 48 back, that is a return rate of 77,41 %.

**1. Quality of the event:** 89,5 % thought it was extremely useful and 10,5% it was useful. The majority was satisfied with the programm (91,6% - excellent) and the organisation ( 82% - excellent, 18 % - good).

Here are some statements of the best aspect of this event:

- scientific program
- Quality of presentation, time for discussion
- Enough time for discussion, topics of high practical relevance
- All presentations, interdisziplinarity
- Great networking opportunity and scientific exchange
- very interesting discussions, excellent overview

**2. Relevance of the event:** For 89,5% it fulfilled the educational goals and expected learning outcomes very much, for 10,4 % it fulfilled it somewhat. Again 89,5 % thought the presented information was well balanced and consistently supported by a valid scientific evidence base. Only 0,04% thought of it somewhat. There was no negative evaluation to this question. For the subsegment: how useful to you personally was each session the response was low ( only 33 participants did reply to this question, 100% out of them found it extremely to useful).

**3. Suitability of formats used during the event:** For 91,6% there was adequate time available for discussions, questions & answers and learner engagement, for only 0,6% there was „yes, sometimes“ the right choice. Here again no negative evaluation.

Some answers to „Can you indicate any innovative elements during the activity?“

- newest informations in the field of digestive surgery and microbioma
- experts opinions on problems
- Learning videosessions
- very active young surgeons
- Follow up of patients after bariatric surgery, the microbiom and new insights, Vascular surgery for visceral surgeons

**4. Ways the event affects clinical practice:** 91,6 % replied, that the information they learned will very much be implemented in their practice, for 13% it will somewhat be implemented.

„Can you provide ONE example how this event will influence your future practice?“ Some replies:

- Reevaluation of indications in hernia surgery
- plastic surgery after bariatric intervention is viable and effective and I will refer patients to specific centers
- Exchangeprogramm to learn more about IBD
- laparoscopic technical tips
- value and indication on cme

**5. Commercial bias:** 98% agreed that the information was free of commercial and/or other bias!
